

Reclaimed Antique Granite Cobbles

We also supply sawn off tops of full size cobbles suitable for footpaths, patio areas etc where there is insufficient depth for full size 140mm thick cobbles. (pictured in crate)

Lifted from streets around France and other major European cities these cobbles (setts) are becoming rarer and harder to source. Having imported in excess of 4,000 tonnes since 2012 we are happy with the consistency and quality of supply. Prices are negotiable depending on quantities and Euro exchange rates.
